Mathematical Vocabulary Progression Document

Introduction

The use of accurate mathematical vocabulary is essential for children's understanding and communication of mathematical concepts.

This document is designed to assist with the teaching of vocabulary across EYFS, KS1 and KS2 and is aligned with the White Rose schemes of learning. This document identifies in which year group vocabulary should be explicitly taught and introduced. However, language should be revisited in subsequent year groups to ensure children are consolidating their understanding.

Teachers can use this document to ensure that children are supported in using the correct mathematical vocabulary at each stage of their learning. By developing confidence with key terms, pupils can better articulate their thinking, reason effectively, and build a strong foundation for future learning in mathematics.
